## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 20, 21, 26-28 are allowed. The following is an examiner's statement of reasons for allowance: whereas the prior art teaches or makes obvious method for determining an operating state on triggering a fan motor, comprising: operating the fan motor via a switching device; triggering the switching device via a pulse-width-modulated triggering signal, a pulse duty factor of the triggering signal predefining a triggering state of the fan motor; measuring as a measured variable one of a voltage potential at a node between the fan motor and the switching device and a motor current; determining an operating state on triggering the fan motor as a function of the measured variable and the pulse duty factor; recognizing an open load fault if the voltage potential essentially corresponds to a supply voltage potential of the fan motor applied to the switching device; the prior art fails to teach or make obvious the method comprising or combining the method with upon recognition of an open load fault, switching the switching device through for a specific period of time, in order to apply a maximum voltage to the fan motor, so that merely oxidized connection points are cleaned.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
